### DETAILED ACTION

1. This action is responsive to communications: Amendment, filed on 8/31/2004.

This action is final.

2. Claims 1-11 are pending in this application. Claims 3 and 9 are independent claims. In the Amendment, filed on 8/31/2004, claims 2-6 and 9-11 were amended, and claim 1 was canceled.

3. This application claims benefit of 60/219,006 dated 7/18/2000.

4. The present title of the invention is "Method and system for presenting three-dimensional computer graphics images using multiple graphics" as filed originally.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 2-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The amended claims 3 and 9 include the limitation determining a viewing position, "wherein said determined viewing position is independent of an angle formed between a first direction from said determined viewing position to the scene and a second direction that coincides with a boundary of the rectangular subvolume" which is

Art Unit: 2672

not described in the specification. Claims 2, 4-8 and 10-11 are rejected because they are dependent on rejected claims 3 and 9.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 2-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3 and 9 recite the limitation "wherein said determined viewing position is independent of an angle formed between a first direction from said determined viewing position to the scene and a second direction that coincides with a boundary of the rectangular subvolume" in line 8-11 and 17-20, respectively. There is insufficient antecedent basis for this limitation in the claims.

See *In re Steele*, 305 F.2d 859, 134 USPQ 292 (CCPA 1962)

### ***Conclusion***

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2672

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
